

Collaborative Experiences in Effective Water Network Improvements

September 2019

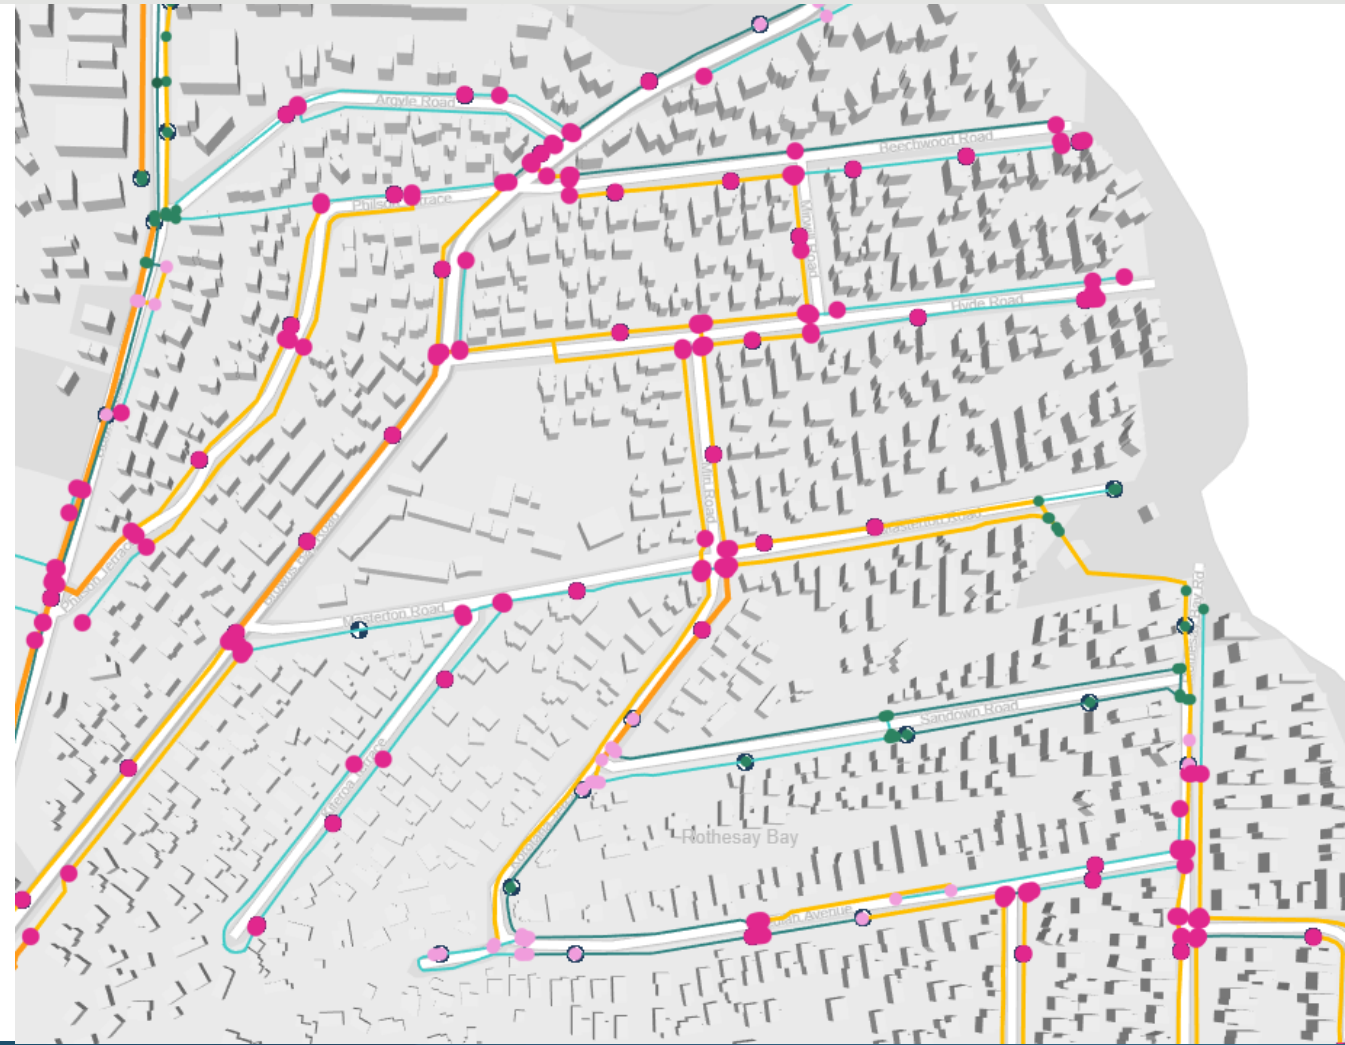

Zoran Pilipovic and Mike Dunstone

Overview

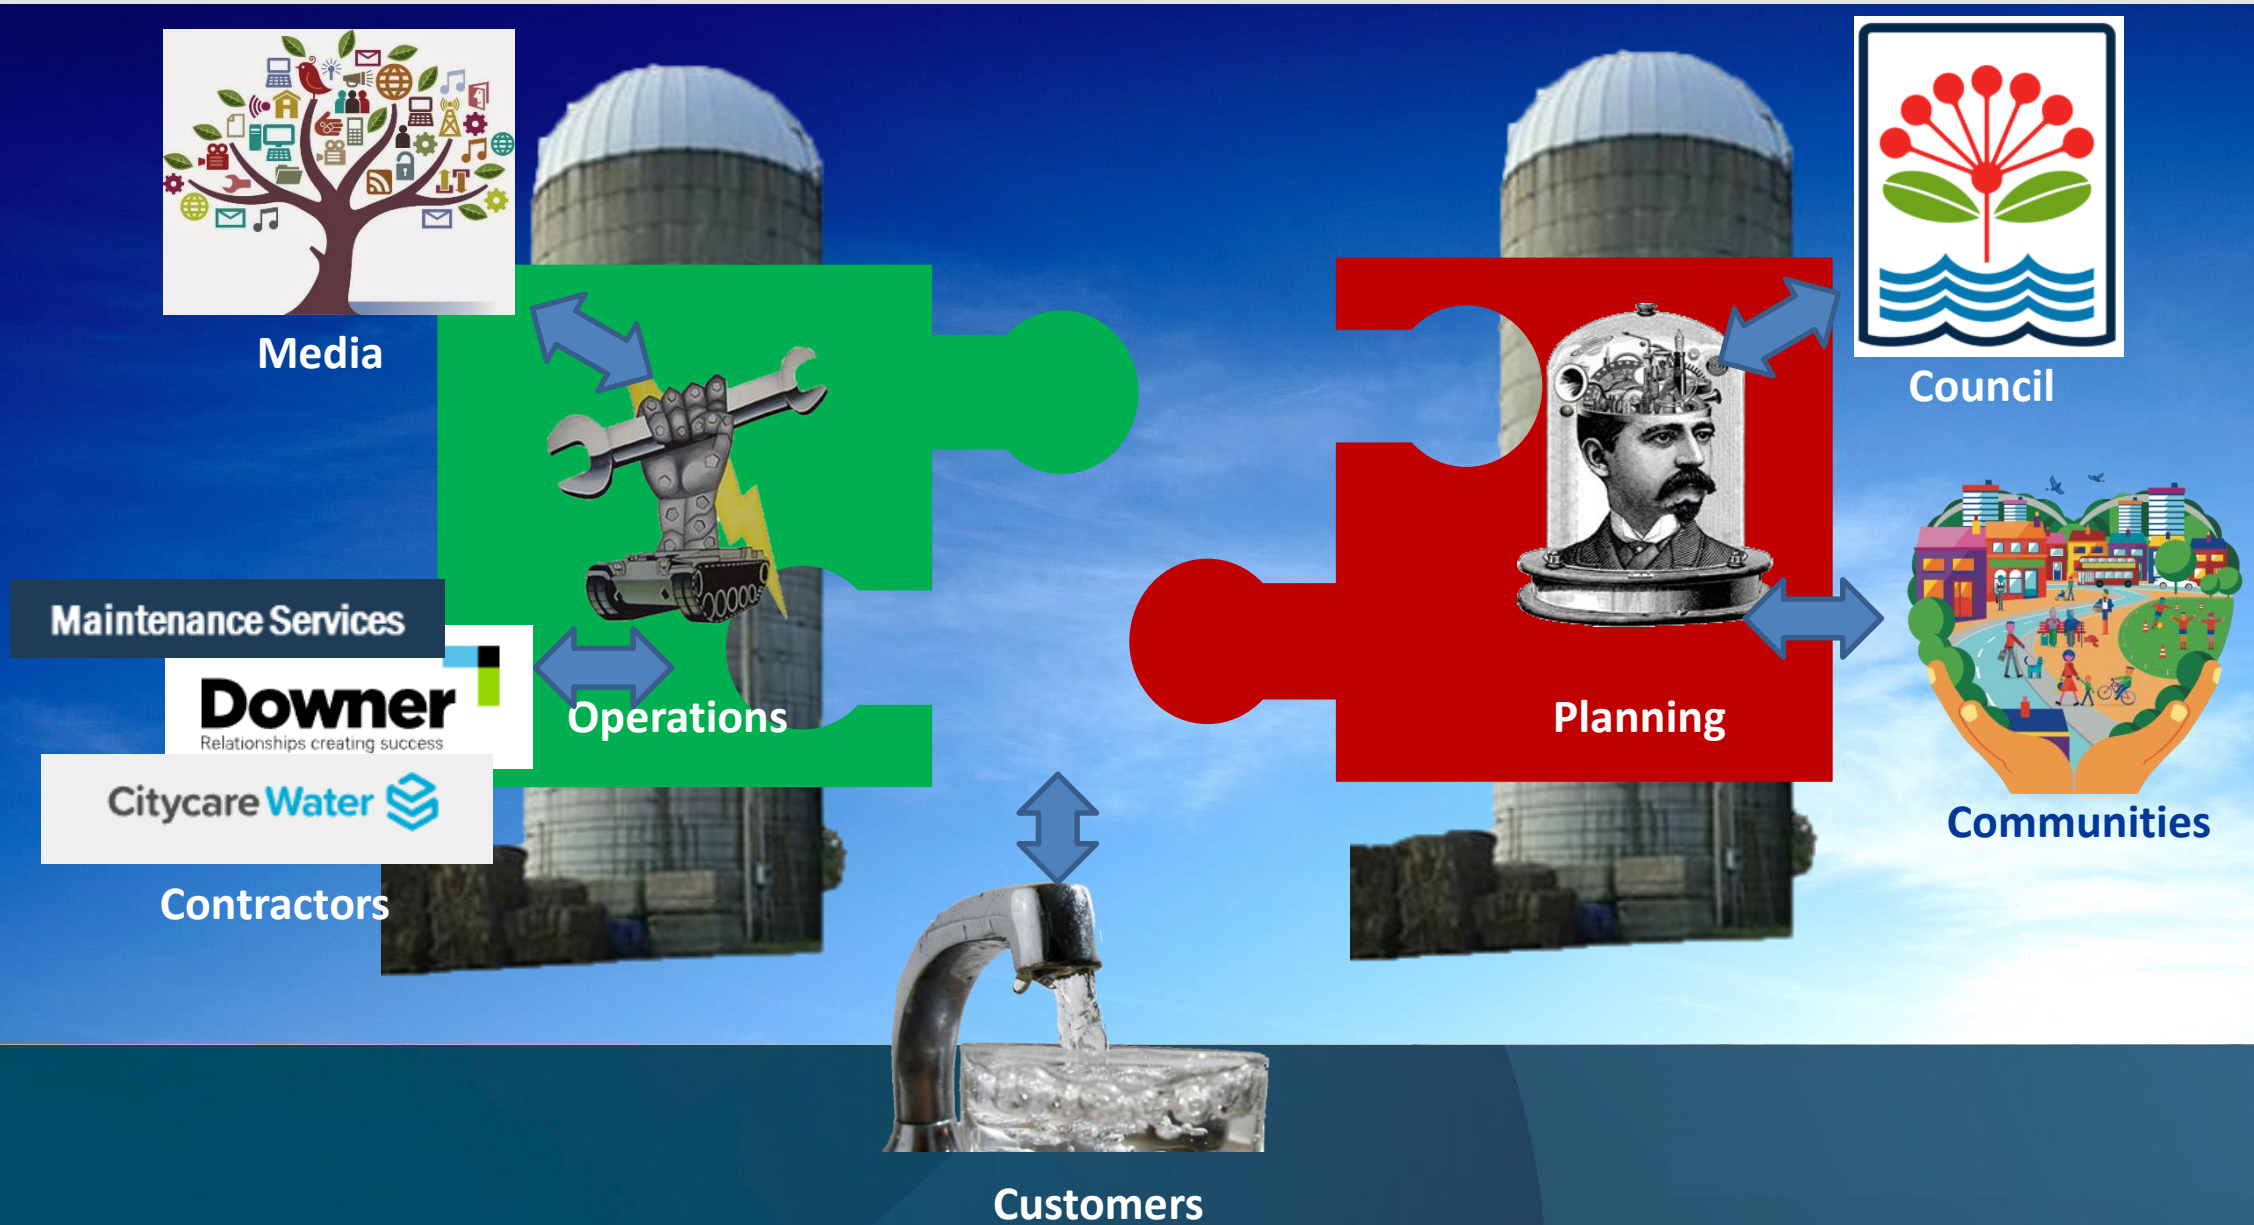

- The Premise
- Why Collaborate?
- Case Study 1 (Lincoln Swanson)
- Case Study 2 (Albany)
- Case Study 3 (Takapuna/Northcote)
- Achieving Successful Collaboration
- The Future

The Premise

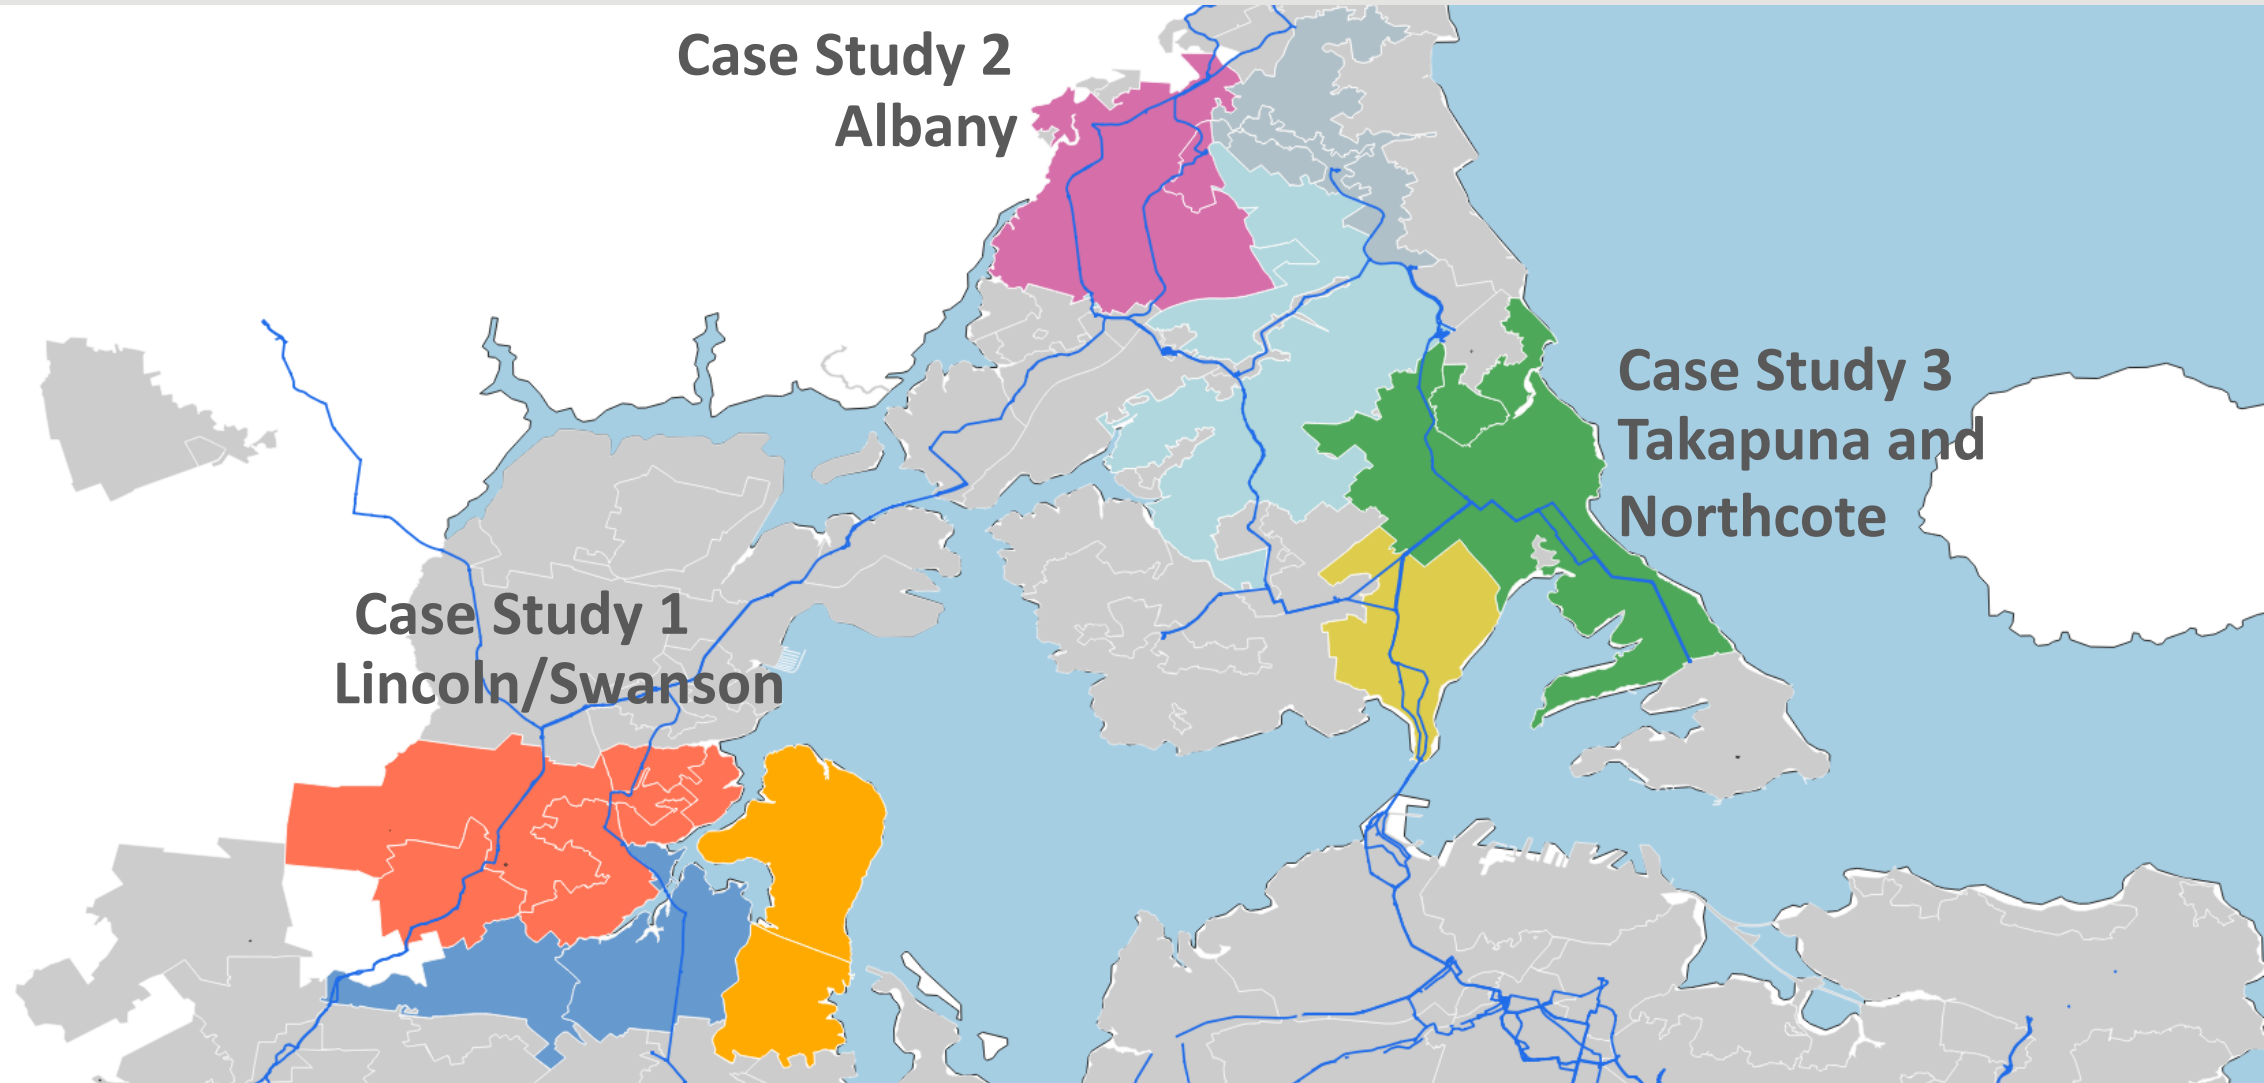

- Water Network improvements are inevitable
- They can impact a large number of people
- Our aim is to carry out the projects with the minimum amount of impact possible
- It takes different skill sets to understand the problem and develop an optimal solution

Why Collaborate?

Case Studies - Overview

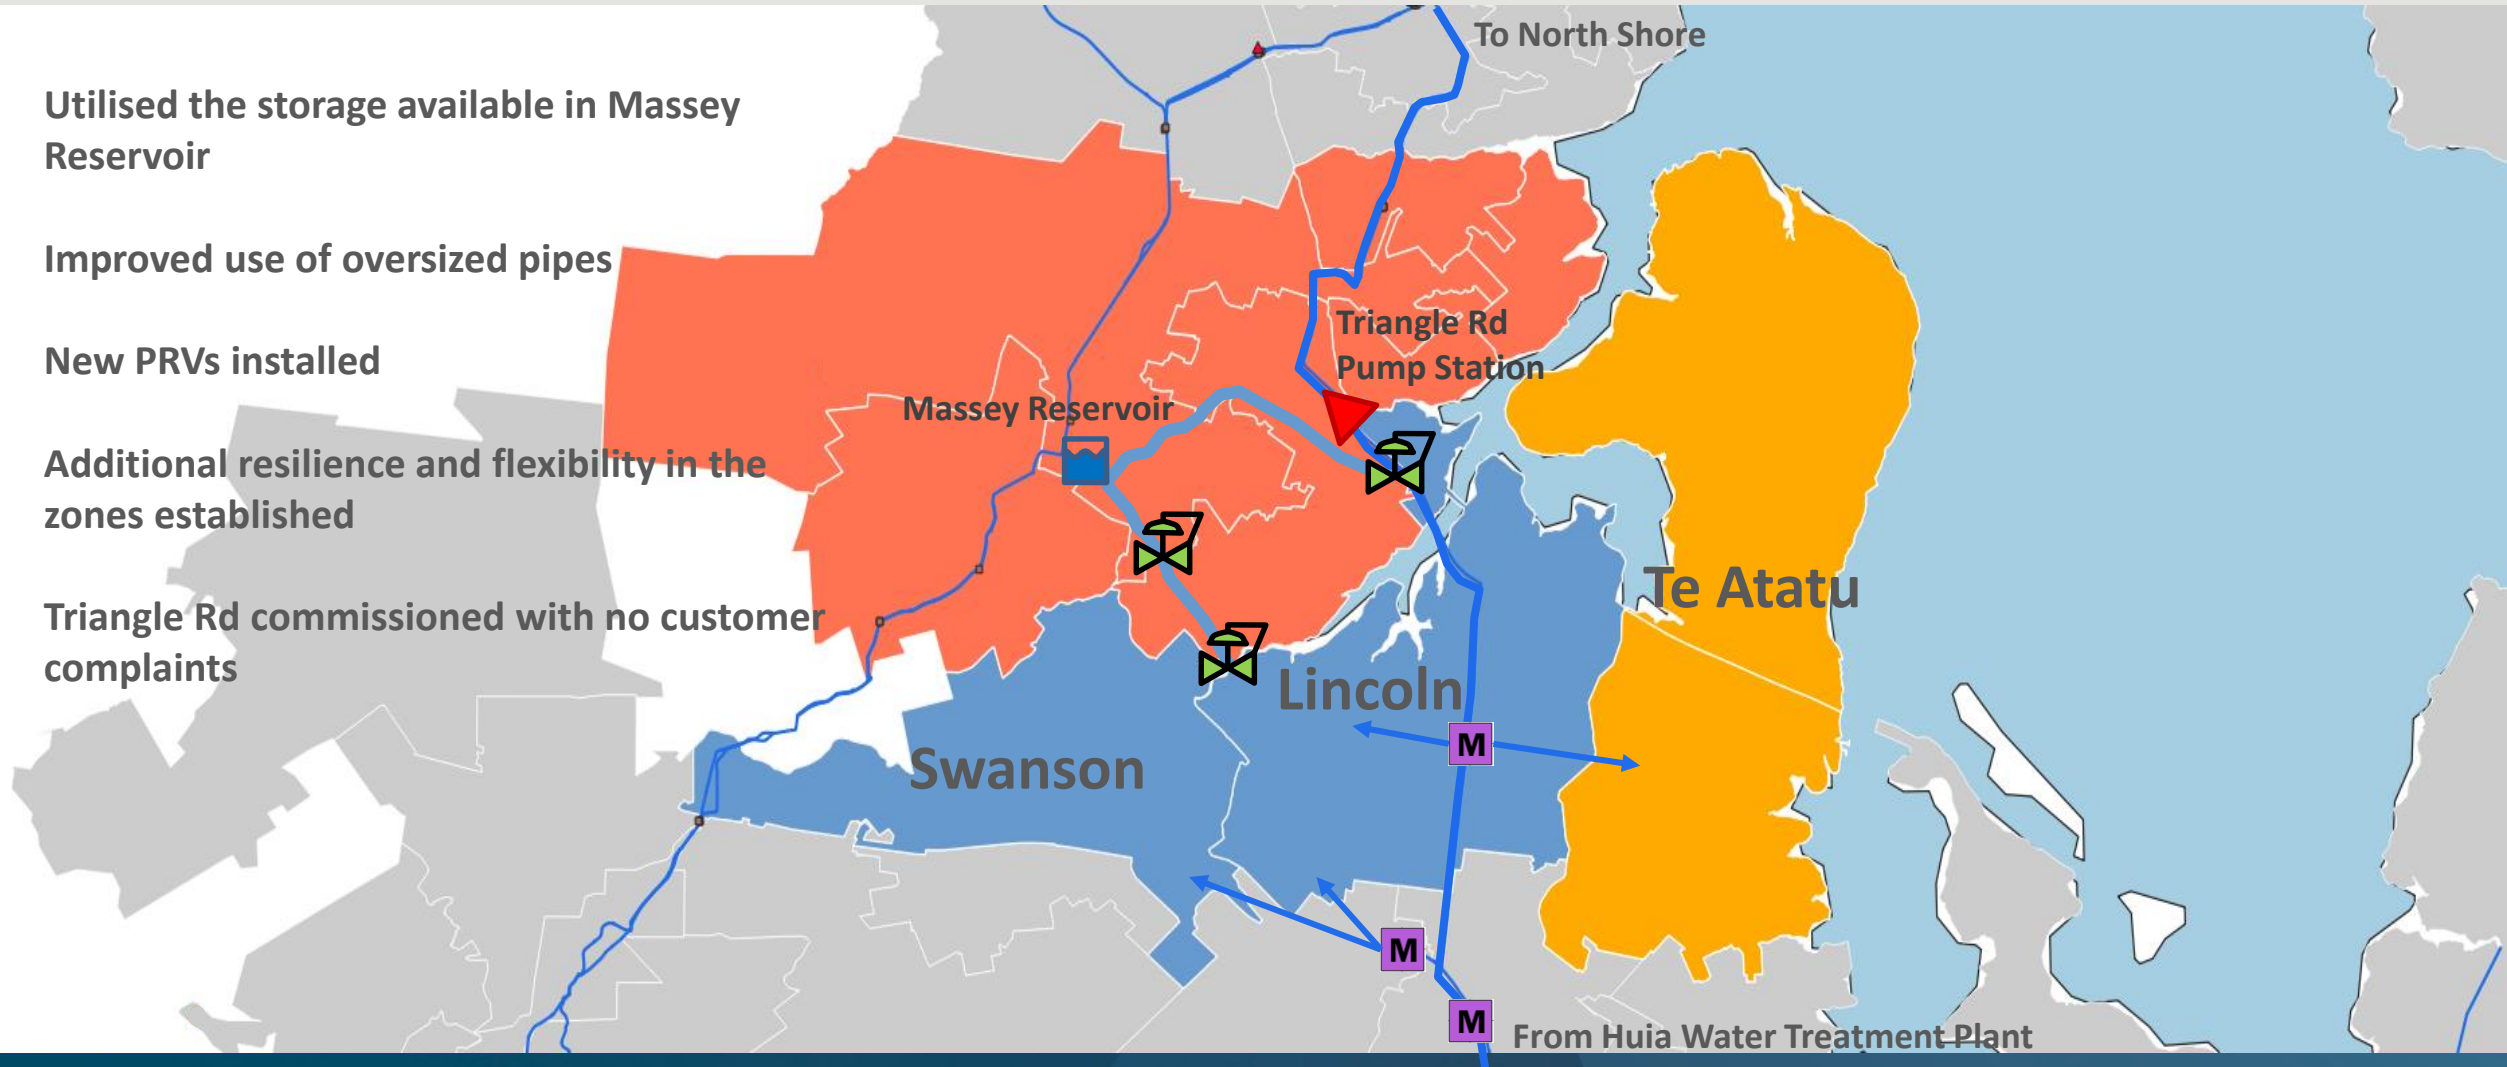

Case Study 1 – Lincoln Swanson - Issues

- The biggest water supply zone in Waitakere
 - No alternative supply
 - Hospitals, shopping malls and schools affected
- Commissioning of Triangle Rd PS would create dirty water issues
- Massey Reservoir and local network pipes oversized for demand

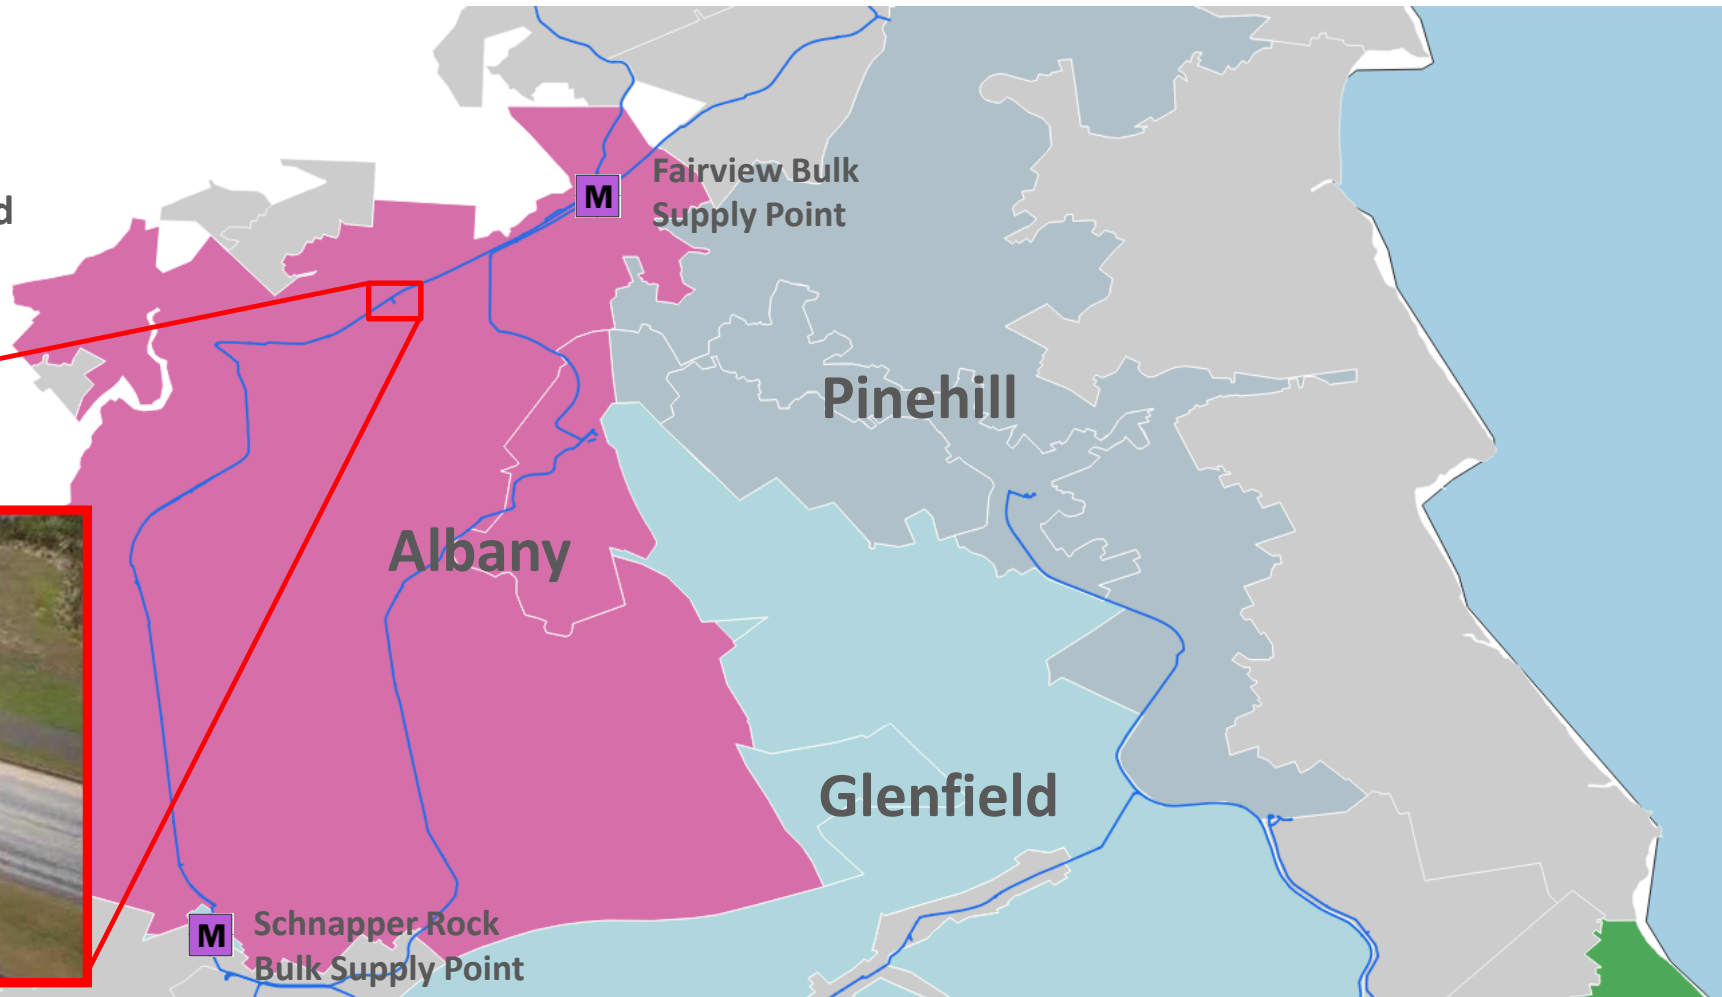

Case Study 1 – Lincoln Swanson - Solution

- Utilised the storage available in Massey Reservoir
- Improved use of oversized pipes
- New PRVs installed
- Additional resilience and flexibility in the zones established
- Triangle Rd commissioned with no customer complaints

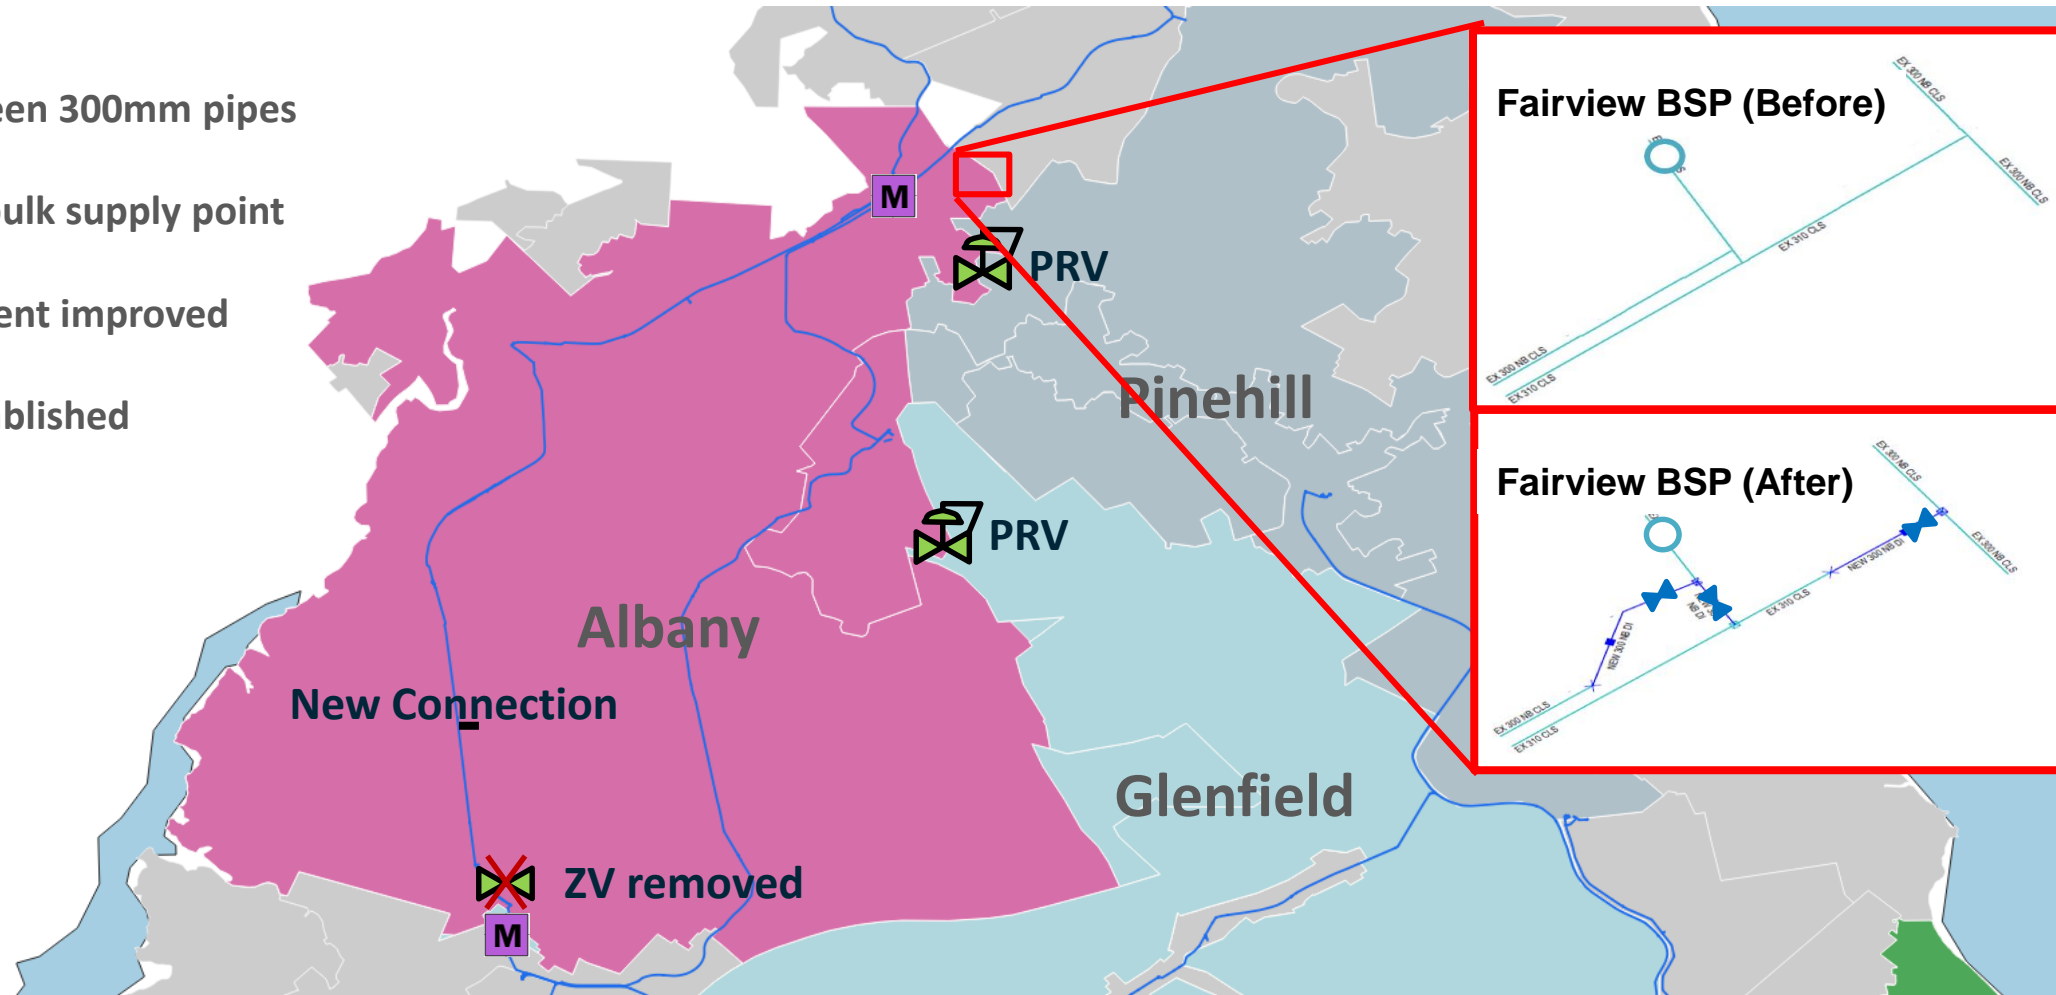

Case Study 2 – Albany - Issues

- Burst water main in Albany required a bulk supply point to be shut
- No alternative supply
- Approximately 3,500 customers affected
- Shopping centre shut down for over 24 hours

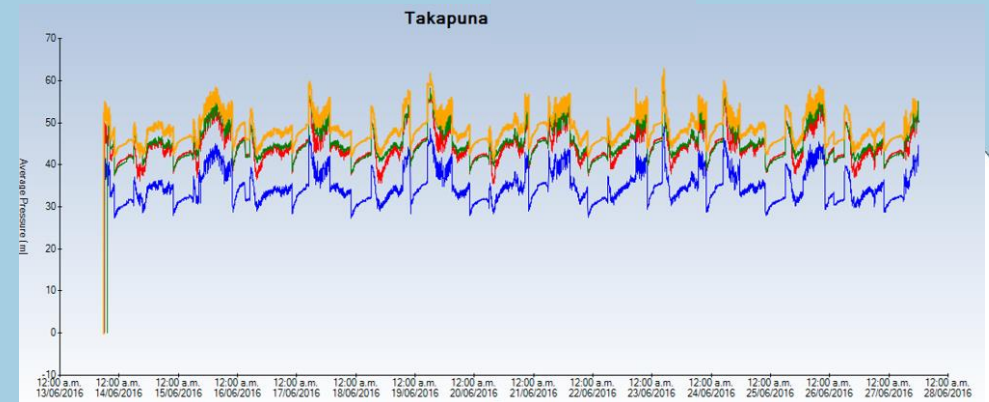

Case Study 2 – Albany - Solution

- New PRVs installed
- New connection between 300mm pipes
- Upgrades to Fairview bulk supply point
- Operational management improved
- Alternative supply established

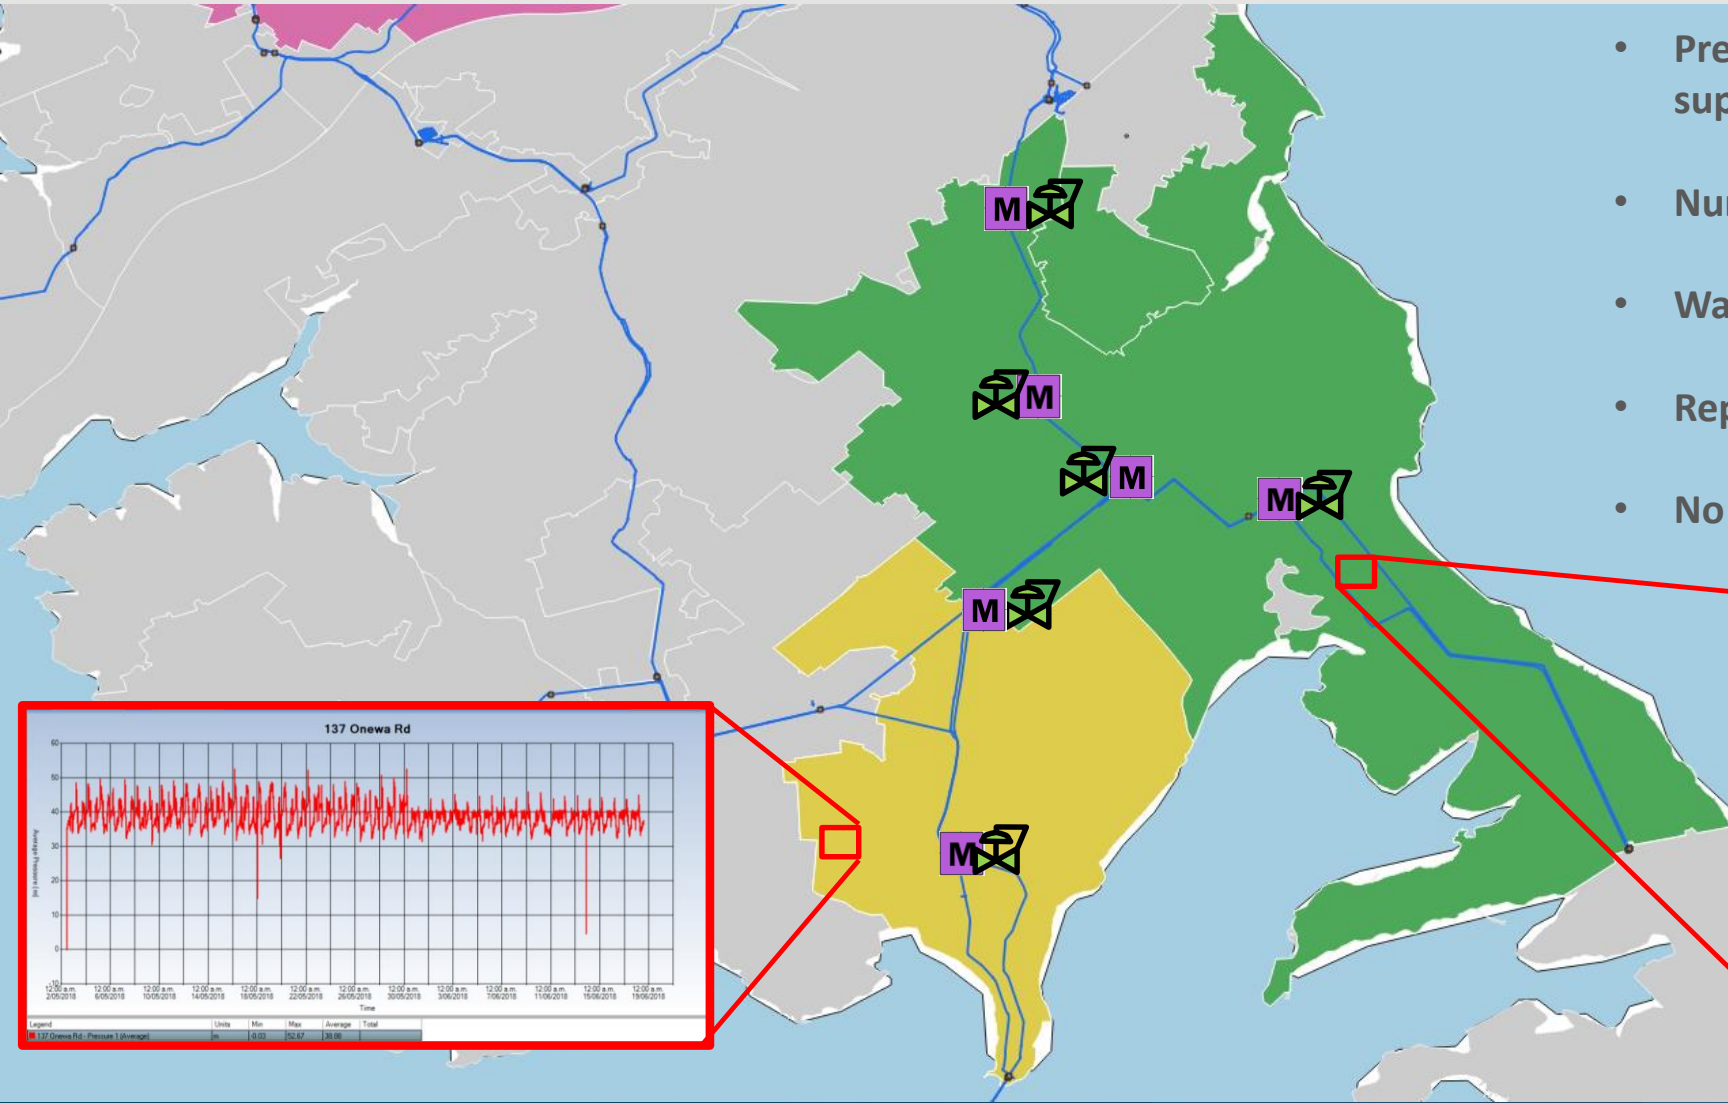

Case Study 3 – Takapuna and Northcote - Issues

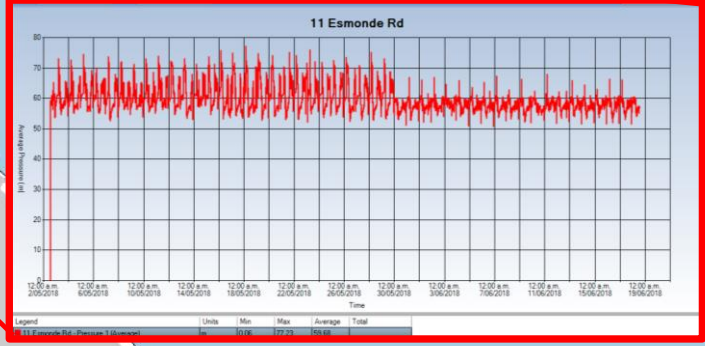

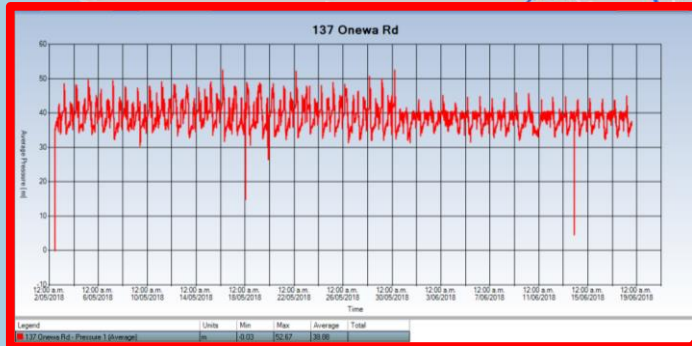

- Over 20,000 customers experiencing high and unstable water pressures
- Large numbers of breaks, leaks and complaints

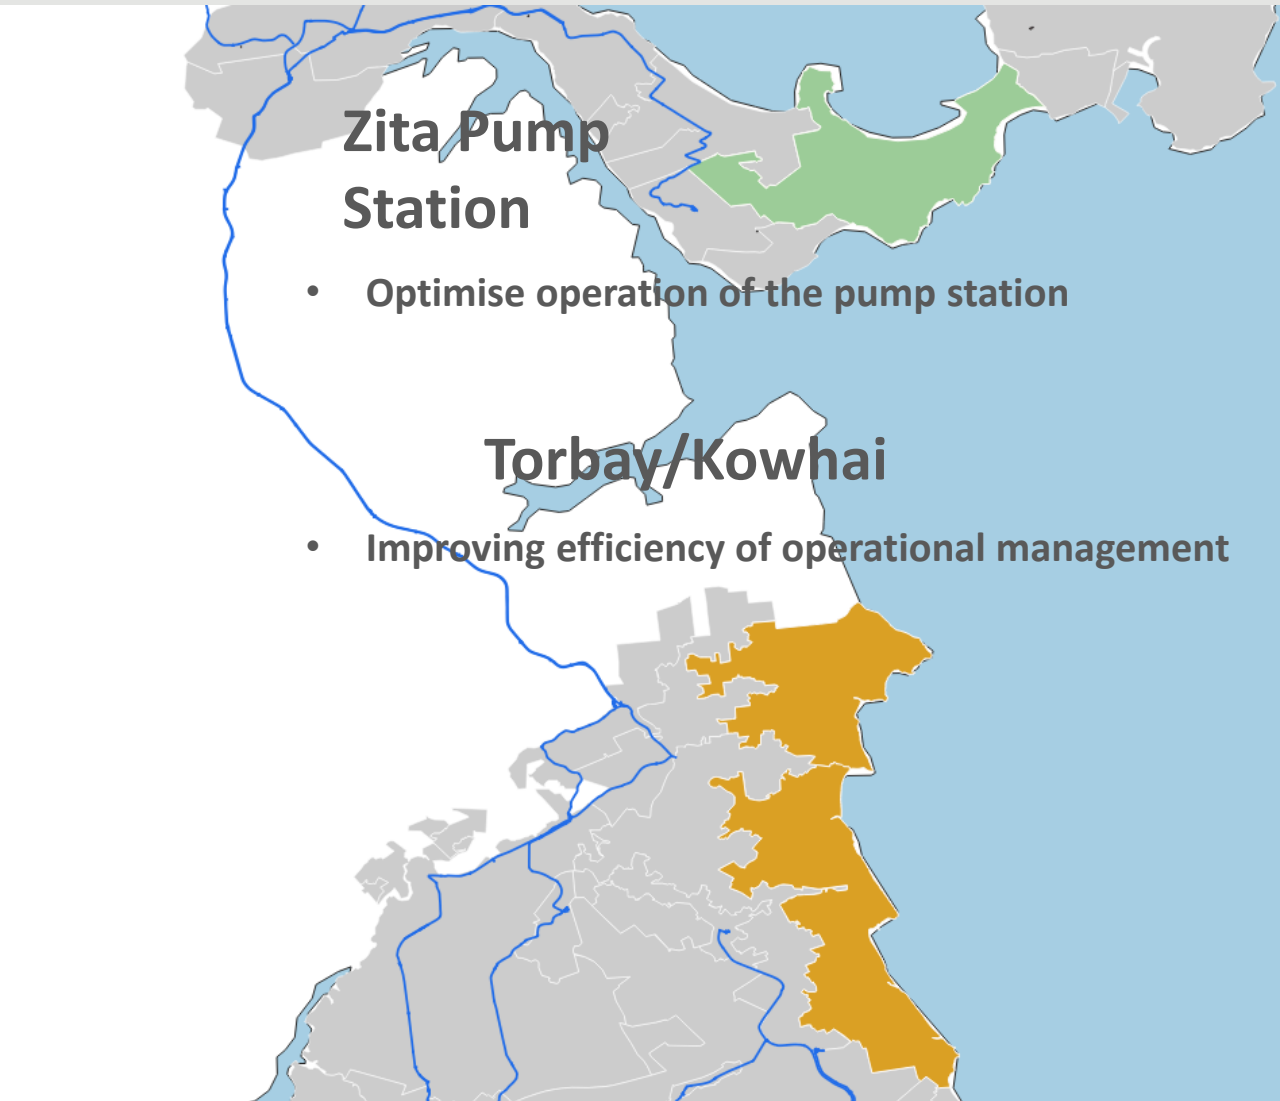

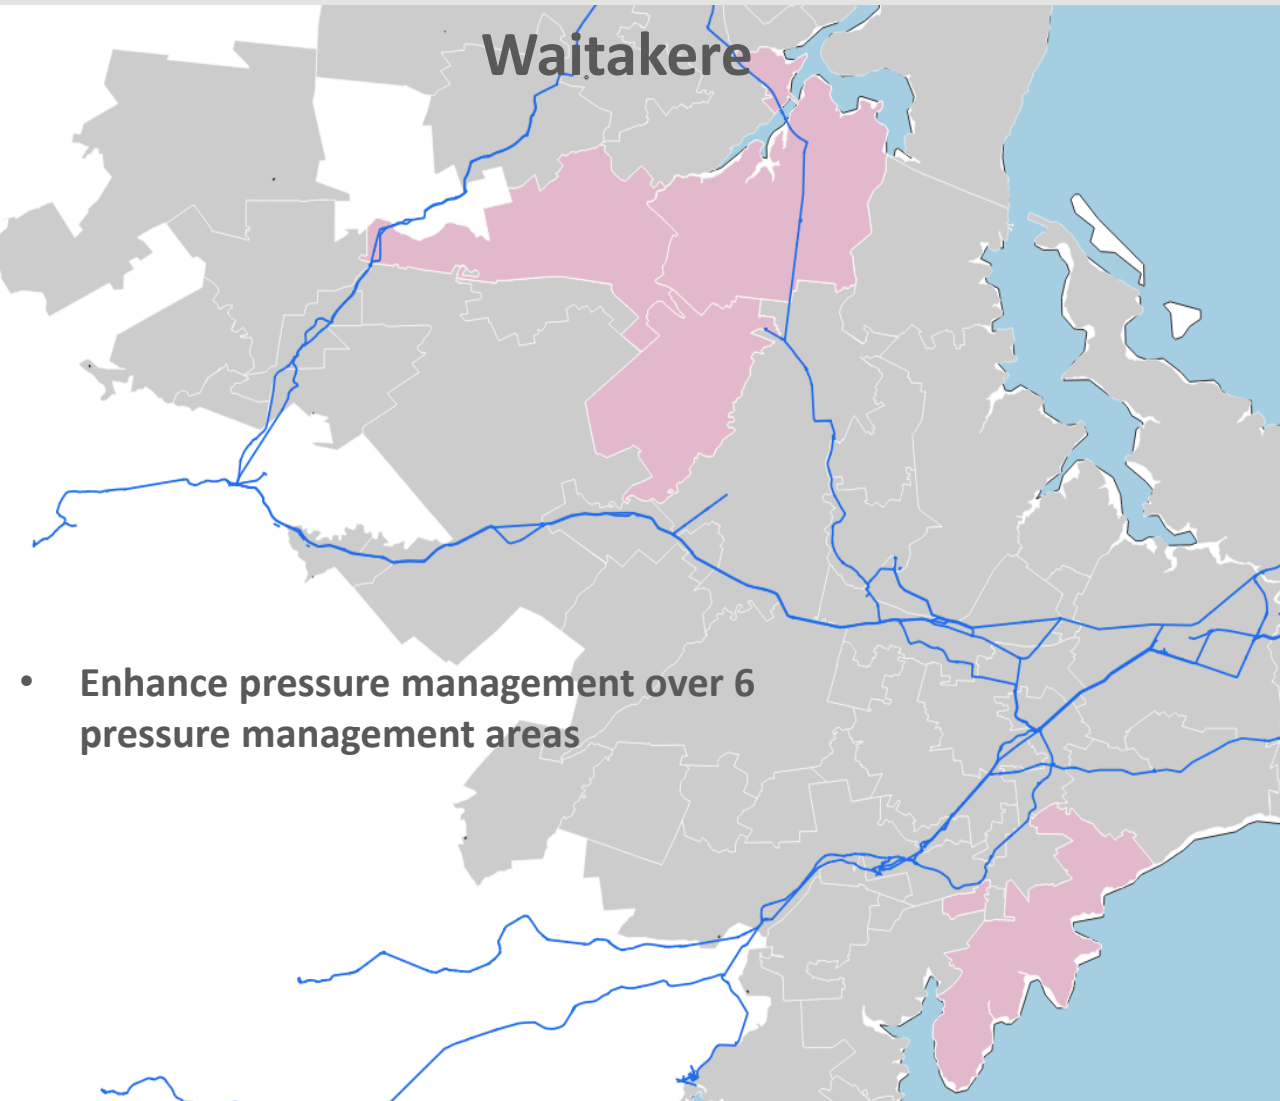

Case Study 3 – Takapuna and Northcote - Solution

- Pressure reducing valves installed at 6 bulk supply points
- Number of water main breaks reduced by 46%
- Water Jobs reduced by 31%
- Reported leaks down 25%
- No customer complaints received

Current Projects

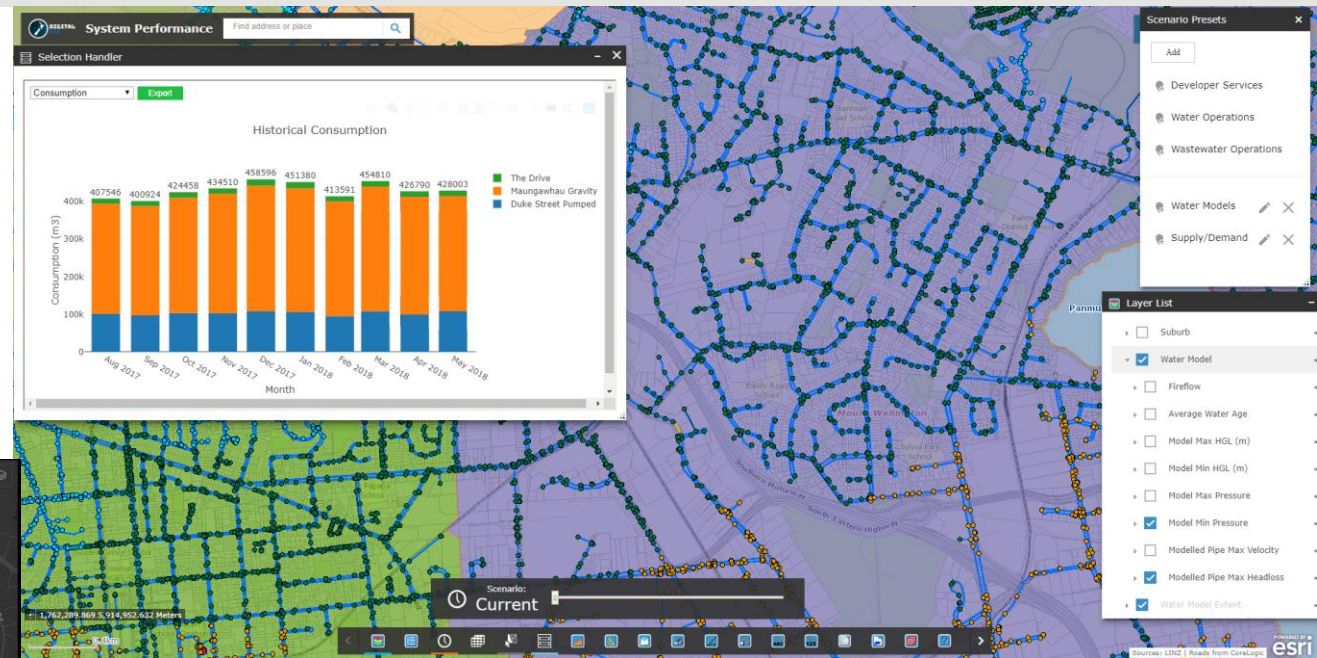

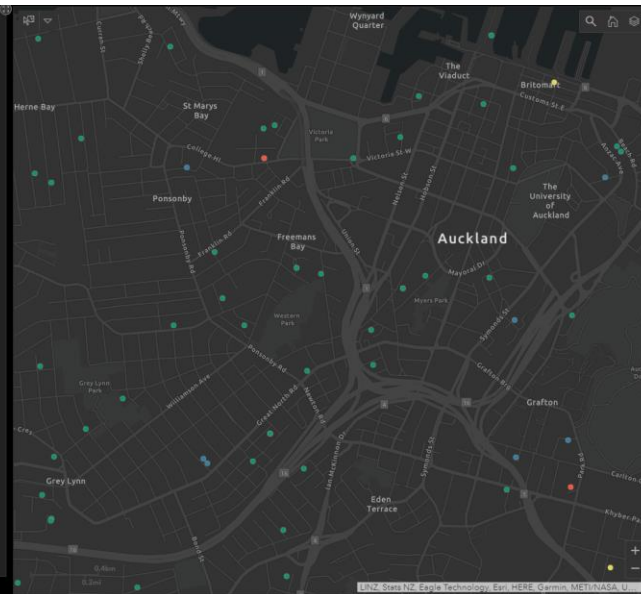

Success Looks Like

- Better Use of Resources
 - Cost Savings
 - No Complaints
- More resilient and flexible system

Future

- Using Better Tools to Share Data
- Data Serves up Better Insights

- Interactive technology
- More Inclusive Collaboration
